### Mounting Assembly

### Glass Assembly

<b>Step 1</b>  Shut off the main electrical supply to the junction box from the fuse box/circuit breaker. Turning power off at the switch is not sufficient.	<b>Step 2</b>  Locate junction box. Attach the mounting plate to the junction box using the junction box screws.
<b>Step 3 (SKIP IF NO PULL CHAIN)</b>  Drop pull chain through bushing in face of canopy.	<b>Step 4</b>  Using the wire nuts provided, make electrical connections by following the electrical configuration table below. Ensure that all electrical connections are wrapped with ul listed electrical tape.
<b>Step 5</b>  Tuck the wiring into the junction box. Thread one set screw into canopy until flush with face. Hook set screw onto one flange of mounting plate. Tighten opposite set screw until flush with canopy face.	<b>Step 6</b>  Install bulb, confirm proper function of pull switch.
<b>Step 7 - GLASS INSTALLATION</b>  Ensure finial assemblies are easily accessible. Holding the glass independently of finials, slide finial assembly through lower glass hole and thread into lower arm of holder. Continue supporting glass, thread second finial assembly into upper arm of holder. Gently tighten finials until glass is lightly compressed.
